ABOUT ME

Results-oriented Agile Project Manager with a keen interest in AI projects. Proven track record in delivering technical projects, skilled in program management, strategic planning, and leading cross-functional teams. Proficient in managing end-to-end project lifecycles, optimizing online sales processes, and fueling business growth.

WORK EXPERIENCE

Project Manager AI → Eviden Worldgrid – Paris France
04/2024 - present

- Led a team of five experts in deploying the Gen AI model for internal operations.
- Orchestrated the deployment and integration of the AI model, minimizing disruptions and maximizing efficiency.
- Led the experimentation phase to optimize model performance and identify key use cases.
- Managed security challenges by implementing robust protocols and ensuring compliance with regulatory standards.
- Facilitated communication between departments and stakeholders, ensuring smooth execution of the Gen AI project.

Technology > OpenAI, Azure, Jira Rest API

Technical Consultant/ Project Manager → Atos Worldgrid – Paris France
09/2022 – 03/2024

- Provided expert technical consultation to EDF Renewables – the biggest electricity provider in France.
- Configured and customized IFS (Integrated Financial System) to align with the needs of EDFRE.
- Conducted consultations with clients to thoroughly grasp their needs, challenges, and objectives.
- Prepared daily technical reports, presentations, and documentation to communicate complex concepts and findings to diverse stakeholders.
- Worked collaboratively with cross-functional teams to improve system automation, including API integrations.
- Successfully managed the implementation and operation of a custom-tailored middleware solution optimizing data flow and enhancing overall system interoperability.

Technology > IFS systems; Python; Django; Debian/Apache Management; API modeling, implementation, and integration.

Web Commerce Project Manager → Americaneagle.com – Chicago, IL
12/2020 – 08/2022

- Led and managed up to nine web commerce projects at the same time from initiation to successful delivery, ensuring adherence to project scope, timeline, and budget.
- Collaborated closely with stakeholders, including business owners, developers, designers, and marketing teams, to define project goals, requirements, and success criteria.
- Conducted thorough project planning, resource allocation, and risk assessment to ensure smooth project execution and timely delivery.
- Coordinated cross-functional teams daily, assigning tasks, monitoring progress, and facilitating effective communication to ensure alignment and project success.
- Developed and maintained project documentation, including requirements specifications, test plans, and user manuals.
- Conducted regular project status meetings to provide updates to stakeholders and address any project-related issues or concerns.
- Oversaw quality assurance processes, including testing and user acceptance.

Technology > Jira, Confluence, Big Commerce, Oro Commerce, Shopify, Akeneo, API modeling
Clients > Chanel, Playboy, GLHuyett, Copperfield, Cerify, etc.

Product Manager → Melistics LLC – Chicago, IL
03/2018 – 12/202

- Defined and drove the product strategy for Melistics' cloud-based SaaS tracking solution for e-commerce retailers
- Collaborated with a team of 5 developers, 2 QA, and a UX designer in the development and launch process of the product.
- Gathered, evaluated, and prioritized product requirements. Conducted in-depth marketing and competition research as well as user interviews to validate initial assumptions.
- Achieved 100% launch goals by structuring processes, roles, and permissions: collecting and analyzing performance data; and facilitating transparent communication between teams.

Technology > Jira, Confluence, DevOps, Swagger, etc.
Delivered Products > Product specifications, Product reference manual, Roadmap, API doc., and requirements.

SIDE PROJECTS

❖ **The Superhuman App**
Paris, France (03/2024 à present)
The Superhuman App is a revolutionary tool designed for the ultra-determined, offering lifetime time-tracking capabilities tailored towards personal goals. Powered by AI, it provides insightful statistics on time allocation, uncovers correlations between emotional states and productivity, and offers actionable suggestions for optimizing time management and well-being.

❖ **Dell Data Center Navigation**
Ann Arbor, USA (09/2018 à 05/2019)
As the leader of the "Algorithms" team, I led the development of the backend functionality for an indoor positioning system used to locate servers in DELL EMC data centers.
